About Me

I am a Italian Computer Engineering Master's student at Politecnico di Torino, specializing in Software Engineering. Passionate about full-stack web development and low-level systems, I combine an analytical approach with hands-on experience to build robust, scalable, and secure production-ready applications.

Core Tech Stack

- Programming Languages:** JavaScript, Rust, Python, C, Java, PHP, C, C++
- Web & Frameworks:** React, Node.js, FastAPI, Bootstrap, Ajax
- Tools & DBs:** Git, Linux, SQL, MySQLDB, PostgreSQL, MongoDB

Education

Bachelor of Computer Science

Università degli studi di Torino

Throughout my academic journey, I acquired a solid foundation in logic, mathematics, and systems programming, covering the entire software development lifecycle—from conceptual and architectural design to algorithmic optimization and data security. I developed a strong passion and specialization in software engineering and web development.

Master of Computer Engineering

In Progress

Politecnico di Torino

Highly focused on advanced software engineering, systems programming, and modern software architectures. My coursework deepens my expertise in designing complex distributed systems, mastering clean architecture principles, and building scalable, secure, and production-ready software applications.

Experience

Machine Learning Research Intern

2024-2025

Università degli studi di Torino

- Developed and evaluated Deep Learning models using TensorFlow/Keras for the AI-LEAP project.
- Conducted an empirical comparison of One-Hot, Label, and Binary Encoding to optimize categorical data preprocessing.
- Implemented Data Augmentation techniques, scaling the experimental dataset.

IT Systems & Network Technician (Internship)

2017-2018

ATC Torino

- Managed and automated system administration tasks and maintenance using PowerShell scripting.
- Configured public and private domains and handled the deployment of Linux (Ubuntu) operating systems.
- Installed and structured physical LAN/WAN network cabling to ensure reliable office connectivity.

Web Development Project Lead (Internship)

2016-2016

I.I.S Giuseppe Peano

- Led and coordinated a web development project from planning to successful delivery.
- Designed and implemented a functional, user-friendly website using WordPress, HTML5, CSS3, and JavaScript.
- Managed team collaboration to align project execution with requirements and deadlines.

Profiles & Certifications

GitHub Portfolio

Feel free to check my portfolio for a full view of my software projects.

Languages & Certification

- English:** IELTS Academic – British Council (B2 Certified)
- Italian:** Native speaker
- Cisco Certification:** IT Essentials 5.0
